

To Whom It May Concern:

The Christian radio station Air 1 has served countless people in my community in addition to myself. Through their distribution of wholesome and encouraging music I am blessed on a daily basis with patience in my driving as well as a positive personality in my approach to life. This impact from a radio station has the potential to exponentially increase the quality of life for the impacted region.

If Air 1 were to be removed from the radio by any other programming, including that of a LPFM frequency, it would drastically affect my life and the lives of those around me. Forcing any person without a CD player in their car to tune into secular music will naturally increase their aggressiveness on the road as well as in life. Having spent most of my life not knowing about Air 1, I speak from experience in witnessing the change in my personality now that I tune into nothing but encouraging and uplifting Christian music that is found at Air 1.

For the above-mentioned reasons I feel as though it is in the best interest of the general public to have at least some minor percentage of the population in a positive disposition while driving, or working, or simply living. I have even witnessed people excited to hear Air 1 being played at popular secular stores in the mall. So it is without hesitation that I must respectfully request there be no interruption in the delivery of the only remaining healthy mass-market media.

Sincerely,

David O'Rafferty, An incredibly concerned Air 1 listener/supporter
